MILESTONE THREE

PERSONAL PORTFOLIO WEBSITE • GDT250 • DUE NOVEMBER 15

1. Set up responsive design for three screen sizes (devices) for your *contact* and *about me* pages using the breakpoint bar; revise your design for each breakpoint as needed.

2. Refine your designs for your *home* page, *contact* page, and *about me* page (they should appear finished, even though alterations can be made later).

3. Create at least one more master page ("B").

4. Design your gallery/port page: at this point there may be behaviors to add in Milestone Four, so static images will suffice.

5. Make certain all placed/pasted images are sized correctly/RGB color mode.

6. Any pinned item should work appropriately.

7. Place alternate text for each placed/pasted image.

8. Make sure all links for placed items are unbroken.*

Each item in Milestone One is worth 10 pts. except for item 2, which will count for 5-20 points; the total Milestone is worth 90 pts. At this point in the project, design/aesthetic considerations ARE being assessed, as well as your ability to use the program.

• to assess this item, the instructor will have to inspect each student's work at their individual work stations.
